

It is three-quarters of a mile long, narrow in the middle, and expanded towards each end to one-sixth of a mile. The bottom is absolutely flat, as indicated by the invariable soundings, the maximum and the mean depth alike 5 feet. The area is about 54 acres, and the volume 12 millions of cubic feet. It is dammed at the north end, and communicates with the sea by a mill lade. The drainage area, including Loch Fad, is fully 3 square miles.

The temperature was 62°·0 Fahr. throughout, nearly 2° higher than Loch Fad.
